Proposed Creative Europe project – to which project are you looking for partners?

| | |
|--|---|
| Sector or field | <i>Architecture, urban design</i> |
| Description or summary of the proposed project | <i>The GIRLSCAPES project grows from the need for gender equal design of open spaces in European cities. It tackles social issues through innovative connection of participatory design and artistic expression as means of reaching spatial awareness. Partners will bring together experiences on participatory practices and raise awareness on inequities of present space design that often poorly address the differences in needs of girls and boys, thus missing the opportunities for their growth and development. Teenage girls are recognized as an overlooked social group. They'll be directly engaged and empowered through GIRLSCAPES by collaborating on experiential analyses of open space, expressing their relationship to it and exploring possibilities for its improvement, all through culture and art. The process will bring together young citizens, architects, urban designers, and performing artists, thus innovatively bridging the gaps between generations and professions, while showcasing cultural diversity of partner cities and countries.</i> |
| Partners currently involved in the project | <i>Društvo Pazi!park (Slovenia), Kreativni krajobrazi (Croatia), Kallipolis (Italy), Basurama (Spain)</i> |
